FACT SHEET

Jellyfish are invertebrates
(animals with no bones).

Box Jellyfish, Man of War,
White Spotted Jellyfish, and
Bluebottle are just a few
kinds of jellyfish!

Diet:
Jellyfish are
carnivores. They
eat tiny fish and
shrimp, crabs,
plankton, and
other jellyfish.

Jellyfish spend
their lives floating
in the sea. They
just wait for
their prey to
come along.

Jellyfish don't
have hearts,
brains, or blood.

Habitat:
Jellyfish live in the
oceans.

Jellyfish have
tentacles and feeding
arms.

Jellyfish can use their
tentacles to sting or
paralyze their prey.

Jellyfish have jelly
bell-shaped bodies.
