

## Math

### SUBI-SWAT

A hands on math game to help students instantly see how many!

Create a "Swat Board" using sticky notes. Parents, call out the prompt and have your child "swat" the answer. (No fly swatter? No problem! Have your child slap the correct prompt with their hands) Use varying prompts. For example, "swat the dot arrangement that represents 2" or "swat 4". For more of a challenge you can say "swat the one that represents 4 less than 7" or "swat the one that shows 5 more than 2".
