

# Sight Word Twister

## Getting ready

- Using chalk draw 25 circles that are 4 different colours
- In each circle write target sight words, spelling words, letters, addition facts etc...
- Create body part cards (right hand, left hand, left foot, and right foot)

## How to play

- The "caller" will pull a body part card and choose a colour. They will call out the body card and a colour (ex. Right foot red)
- The player will follow the directions of the caller and find the closest circle. When they put their (hand, or foot) on the circle they **read** the sight word out loud.
- Repeat
